Investment Strategy

The fund mainly invests, directly or through derivatives, in European bonds. Specifically, the fund invests at least two thirds of total assets in government bonds and covered bonds that are issued by public authorities, or by companies or financial institutions that are domiciled, or conduct the majority of their business, in Europe. Objective: To provide shareholders with investment growth in the medium to long term. The fund's investment philosophy builds on a quantitative and risk-based approach. In actively managing the fund's portfolio, the management team selects securities that appear to offer superior investment opportunities.
