Investment Strategy

The fund seeks to achieve consistent, superior rates of return with low volatility by investing primarily in debt securities rated BBB- or better by S&P or Baa3 or better by Moody's at purchase. The fund manager uses a top-down analysis to exploit opportunities and neutralize unwanted risks, and a bottom-up analysis to maximize total return. The fund manager protects the downside by understanding the risk exposures within the portfolio and the correlation among assets, by diversifying risk factors, by defining/articulating an exit strategy for each position, and by carefully monitoring expected tracking error.
